

# PUBLIC SPACE PLAN

Clayton Pinkins & Lauren Black

## Incorporating The Amphitheater

The amphitheater provides another area for interaction and gathering. During game days this space is often used for vendors and small performances where people can come throughout the course of the day. The amphitheater provides a permanent element for days like this, as well as inspire more activity for days during the off season or other non sporting events.

## Incorporating The Lake

The Lake, in addition the fountain, adds a water element to the space that can provide tranquility as well as a gathering place for activity and interaction. Trees are planted to cover the seating to provide shade for those that choose to sit at the benches. The additional green space can allow for picnics and additional, still shaded by the large trees.

## Food Trucks & Vendors

Certain areas of this space is hoped to welcome food trucks during events as well as during everyday lunch periods. This area is a prime location for trucks and other vendors to set up due to so many city buildings and municipalities being within walking distance. Located in these areas are tables and chairs to allow visitors to sit and eat. They purposely spaced in way to influence greater interaction amongst the tables.

## Incorporating THE FOUNTAIN

The large fountain, depicting the Phoenix bird, also the City of Phoenix emblem, is the center point that can be seen from all corners of this public space. It is they key feature of this design as it can be an area where people meet or sit while waiting to meet others. The fountain also provides secondary seating the space that, depending on the side and time of day, is provided with shade due to the height and size of the Phoenix itself.
